

# MiG-25 BM PE detail set for the ICM kit in 1/48 scale

Includes interior and exterior details

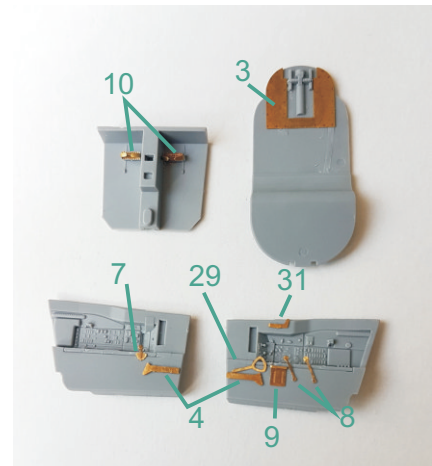

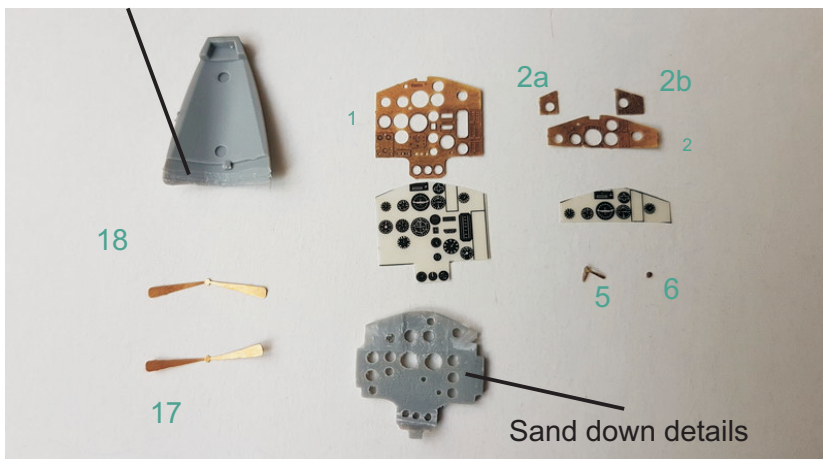

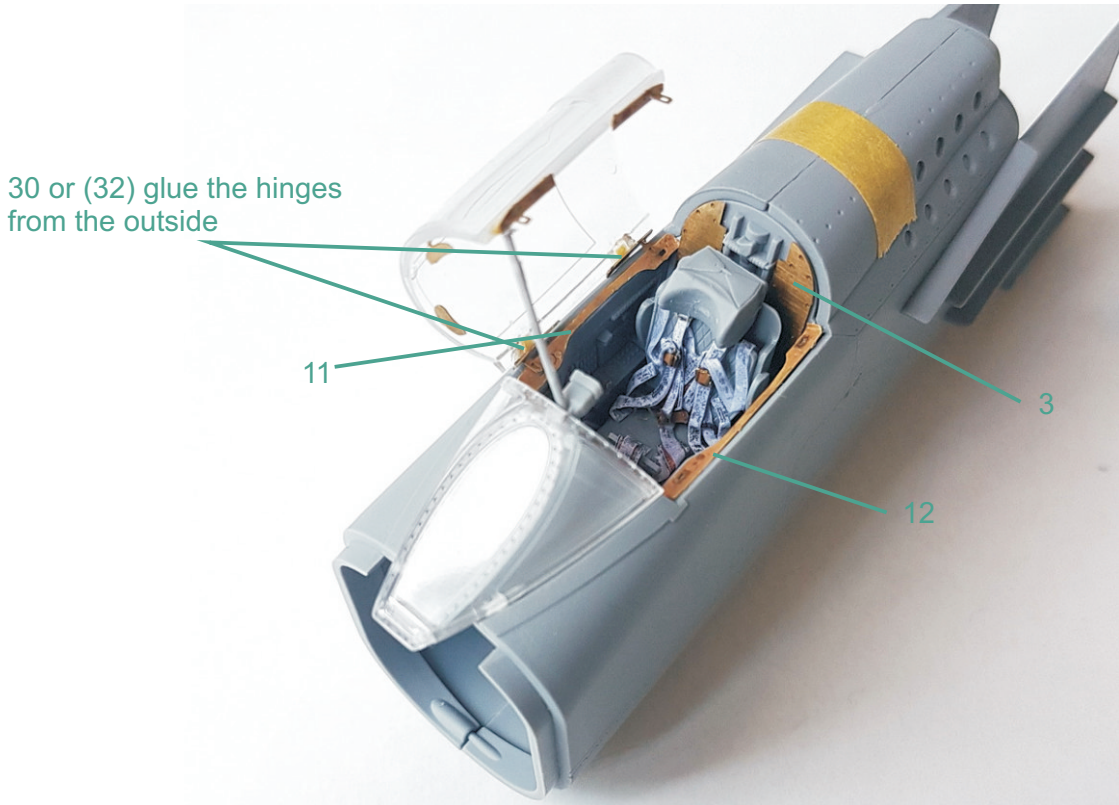

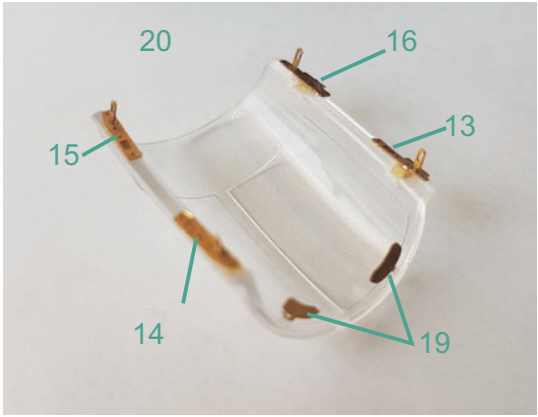

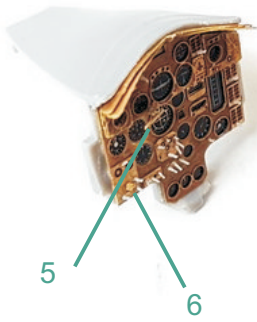

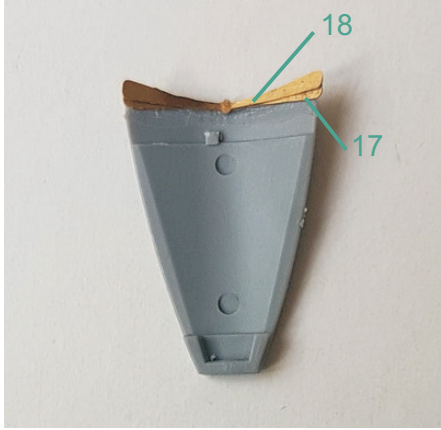

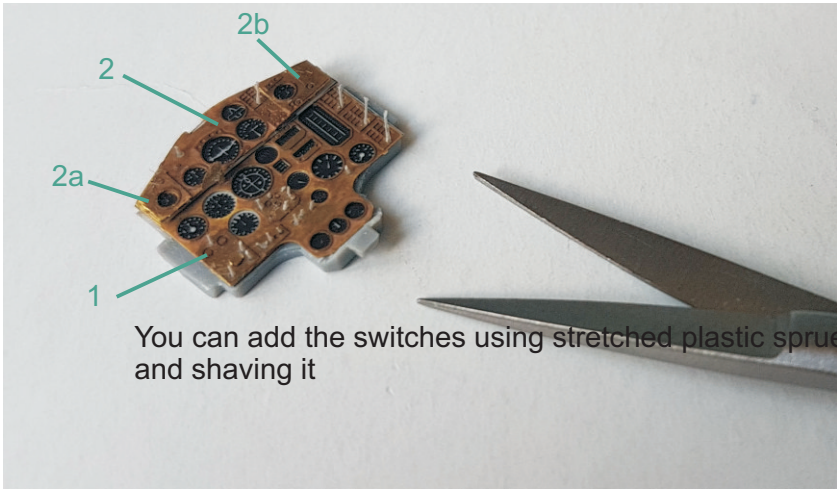

Interior Assembly:

Prepare the plastic kit parts as shown here.

Thin down the edge

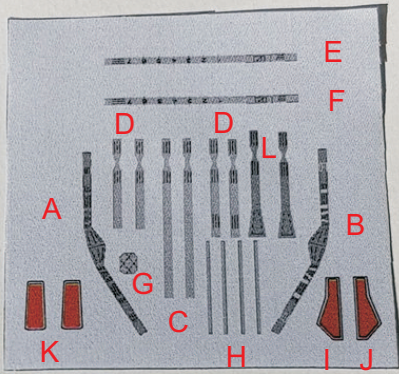

1

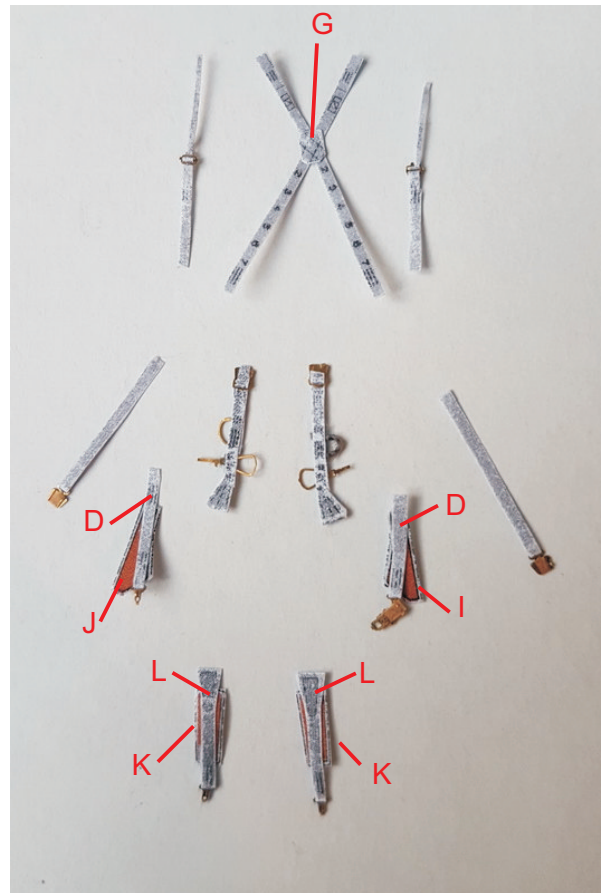

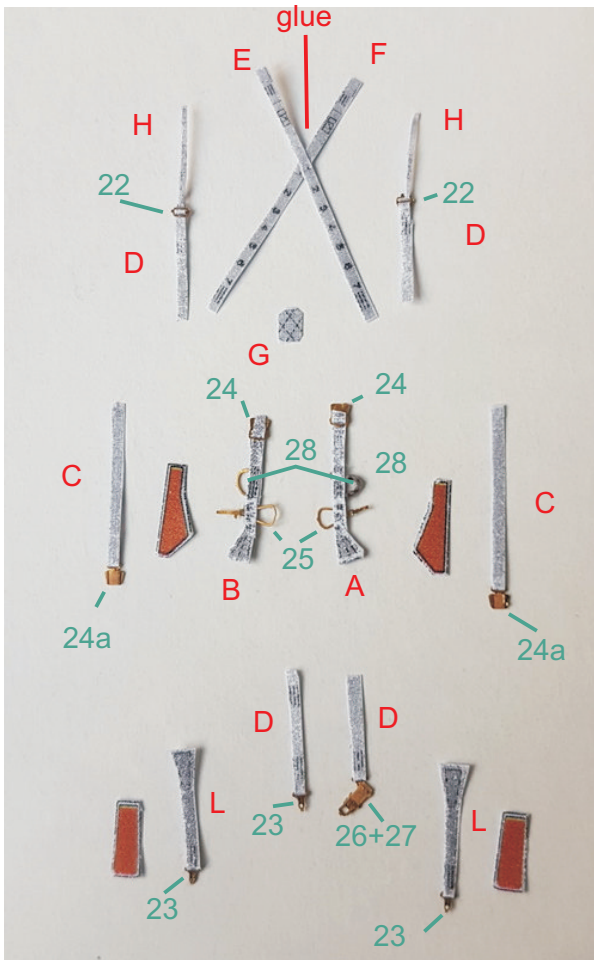

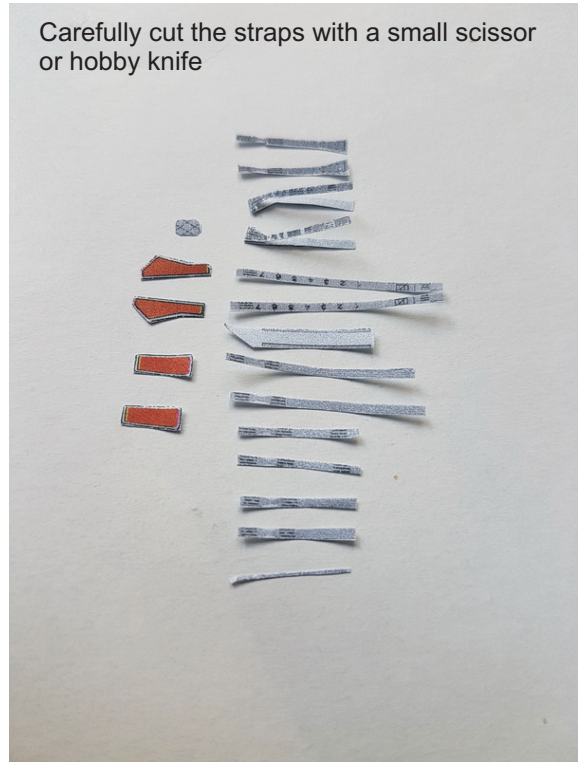

2

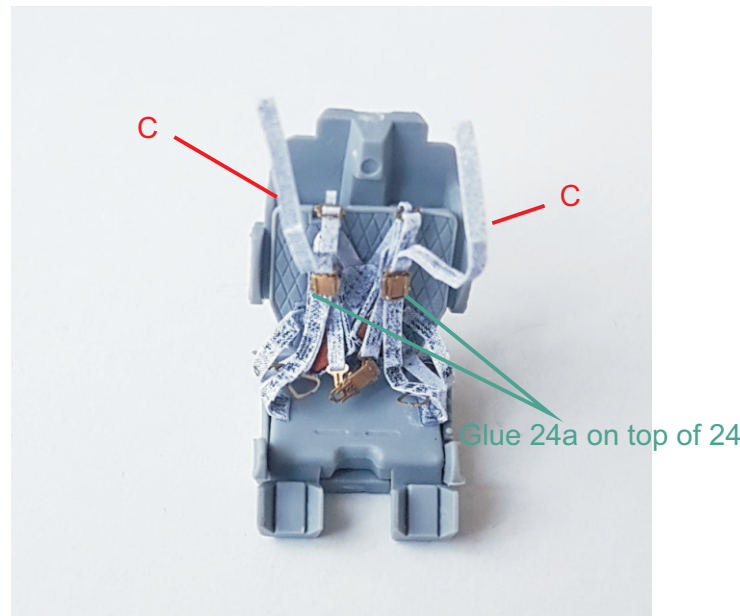

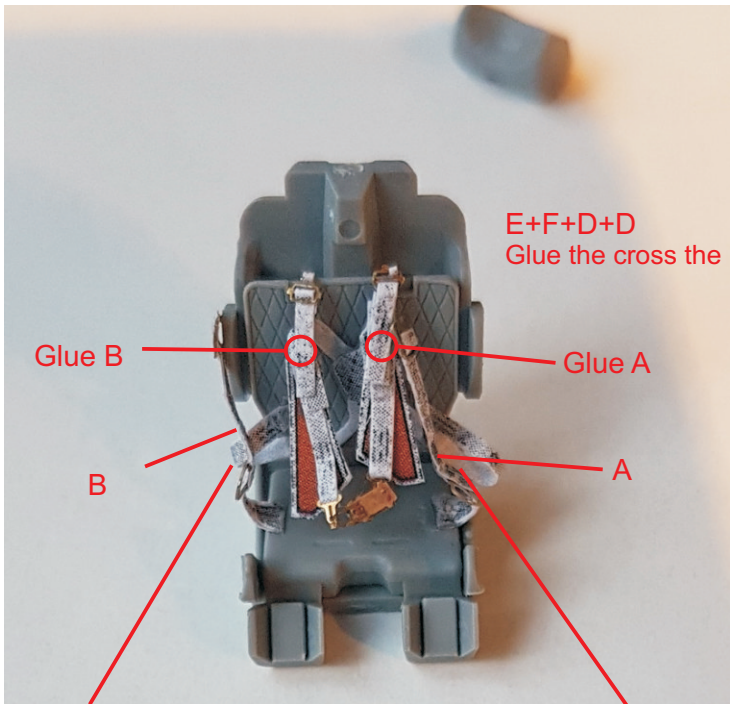

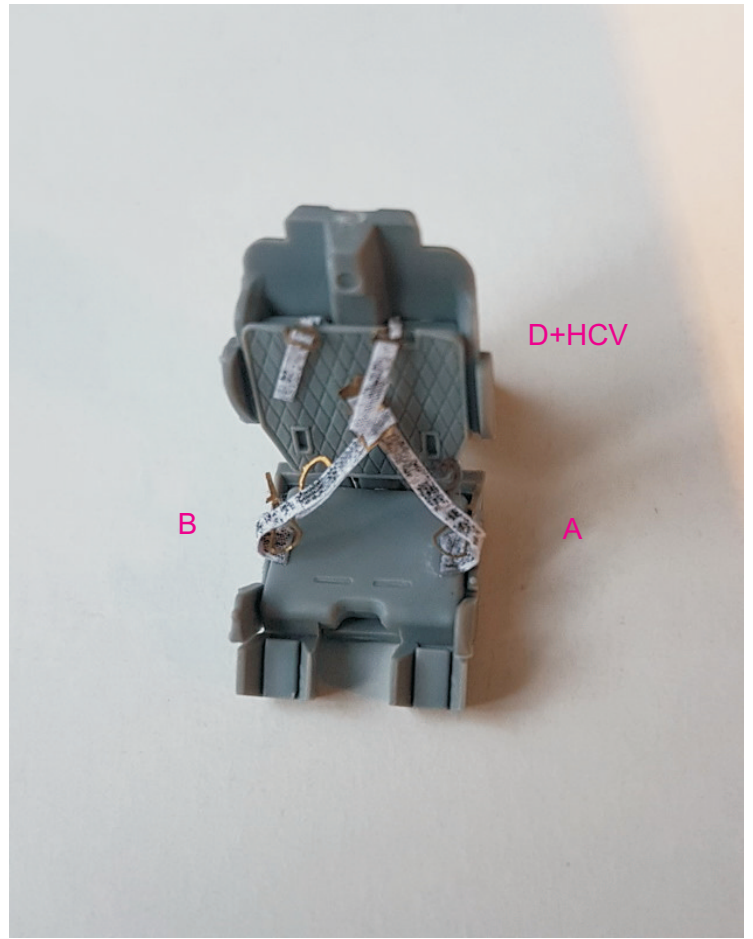

KM-1M Ejection seat assembly:

Take the paper harness sheet.

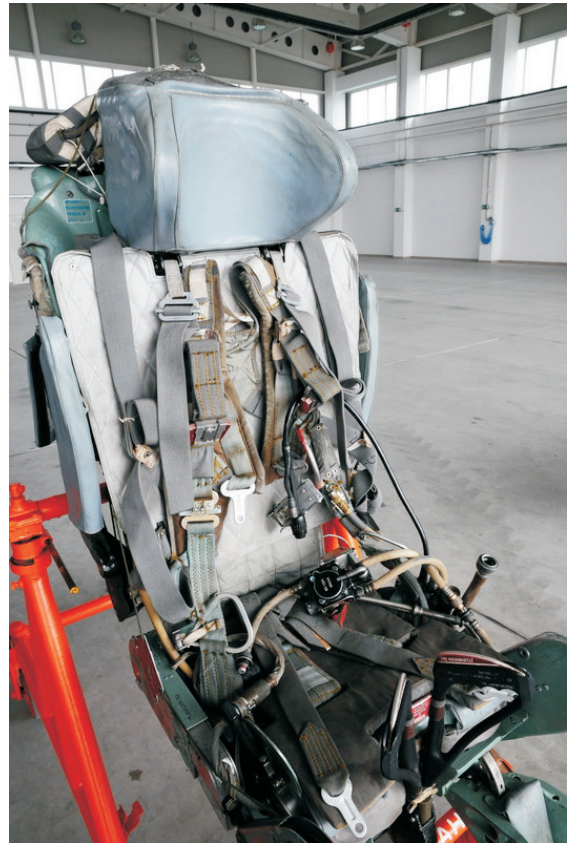

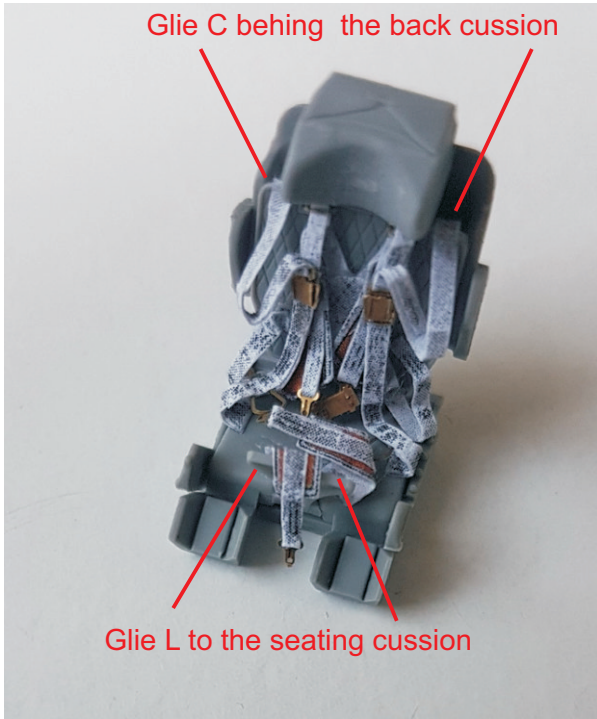

Carefully cut the straps with a small scissor or hobby knife

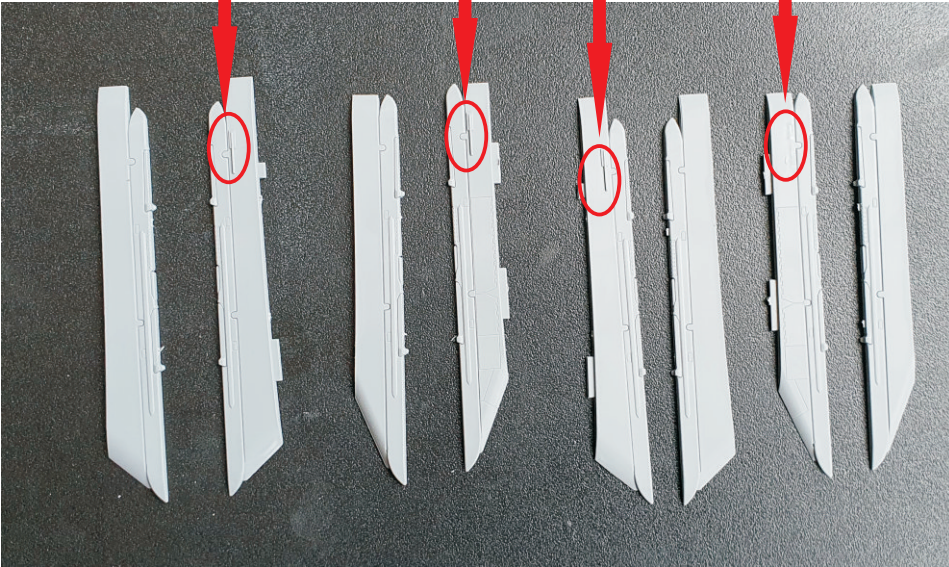

Pass the E and F through the PE loop 28 of A and B and glue the ends to the back.

These 2 real life examples of the KM-1M Ejection seat will help you understand the harness system.

Remove the details from this area on the kit pylons

How to bend the PE 1. Make 4.
